

2010 ACEIT User Workshop

ACEIT Solutions: Efficient, Open, Powerful

2010 ACEIT User Workshop

2010 ACEIT Users Workshop—a premier venue bringing together active users, casual users, decision makers, academia, and ACEIT community members to share their expertise and insights. The focus of 2010 is the total versatility of ACEIT solutions—highlighting its efficient operation, open architecture, and unlimited power.

Keynote Speaker

We are excited to have Mr. Wilmot N. (Dub) Summerall, III, Executive Director for Combatants (within PEO Ships) as the Keynote Speaker. As a member of the Senior Executive Service, Mr. Summerall provides leadership to more than \$46 billion in complex, new construction shipbuilding programs that will define the 21st century surface combatant fleet.

Sessions

This year's workshop will feature ACEIT 7.2 highlights! New features include: Tabbed Workscreens and Windows, RISK allocated phasing profiles, improved POST Cache performance, and many ACE, CO\$TAT and POST stability and usability improvements!

Who Should Attend?

Workshop attendees include cost professionals wanting to stay on top of current information and developments regarding the latest changes, time saving techniques, and best applications of ACEIT. In addition, cost managers, cost analysts and cost engineering professionals from all levels and disciplines in the cost analysis community attend.

Presenters

We expect superb presenters at the workshop—all presenters are experienced ACEIT users who offer leading-edge case studies, innovations, practical techniques, session design tips, and application insights.

Why Should I Attend?

Attendees at the workshop can also influence future ACEIT changes and features. Key members from the ACEIT Working Group (AWG) will be in attendance. The AWG's purpose is to determine the direction of ACEIT. Your voice is vital to the continued health and productivity of ACEIT— capitalize on this opportunity to voice your concerns to the AWG members.

In the tradition of the past ACEIT workshops, there will be two full days of practical and thought-provoking presentations, as well as useful ACEIT "how-to" demonstrations. The ACEIT Users Workshop is and will continue to be a renowned gathering for cost analysts—for its value, energy, innovation, and contribution to the cost estimating community. Please join us this year again in beautiful Santa Barbara!
