Description:

Automated Cost Estimating Integrated Tools (ACEIT) 7.x is a suite of tools that support program managers and financial analysts with developing Life Cycle Cost Estimates (LCCEs) during all phases of acquisition I and II programs. ACEIT includes the following components: Automated Cost Estimator (ACE); CO\$TAT; Program Office Support Tool (POST); Automated Cost Database (ACDB) Report Wizard and DDK; and library. ACE is the estimating portion of ACEIT, and it is a model-building tool for analysts to develop and calculate cost estimate. ACE integrates with RI\$K which is a simulation-based uncertainty analysis tool used to perform cost, schedule and technical risk, and uncertainty analysis. CO\$TAT is the statistical analysis feature that allows users to navigate through the analysis process to develop estimating relationships, such as cost and price analysis, and includes the analysis directly into the final cost estimate. POST provides new inputs to an existing ACE session by executing the underlying ACE session on these inputs; views ACE output results; and creates reports in XML-based file containing all the calculated results for what-if cases. ACDB consists of two applications, the Database Development Kit (DDK) and the Report Wizard. DDK creates customized database that the Report Wizard can search and retrieve cost, schedule, technical, and programmatic data. The library automatically builds and maintains methodology libraries containing analogies, factors, equations, rules and references.

ACEIT 7.x is installed on a current Windows AGM build workstation. Users manually enter data into ACEIT. The ACDB Report Wizard and ACDB DDK programs use their own database method for creating their cost databases. ACEIT does not transmit or receive data from any other server, system, or device. Data is saved to the workstation or the local network share drive, and all data stays internal to the local enclave.

Facts:

- This is a renewal for Certificate 201418043.

CoN Link: https://portal.netcom.army.mil/apps/networthiness/_layouts/NetcomCON/rqstcon2.aspx?requestId=37309

Restrictions:

1. Automated Cost Estimating Integrated Tools (ACEIT) 7.x is restricted for use within assessed and authorized networks and/or data centers having a current ATO.

POC: netcom.hq.networthiness@mail.mil /(520)538-1199

This Certificate of Networthiness is based on a trusted standardized platform, configured per FDCC. All patches and updates will be provided by the host network administrator (NEC or DECC) in accordance with all technical directives, mandates, and IAVM. This Certificate of Networthiness is no longer valid should the assessed configuration be significantly altered. Per Army Cyber Command guidance, all operating environment will implement HBSS capabilities. Upon expiration of this Certificate of Networthiness, this application must be reassessed to ensure it is still compliant with the GNEC architecture and is still networky. Should this software version be upgraded prior to this expiration, the new version must be evaluated for networthiness.
