Tip of the Month

Have you received a new Info message when calculating in ACE 7.4 that you didn't get in 7.3?

A new info message, MTH964, alerts you of rows that calculate values in the last year of the session. This may be intentional if you made the last year of the ACE session correspond to the last year of the program. It also may happen because an F-phased row calculates through the last year of the session when it should really stop at some particular year.

Tip: It is good practice to have at least one blank year at the end of the session to ensure that each calculated cost finishes at its intended end date.

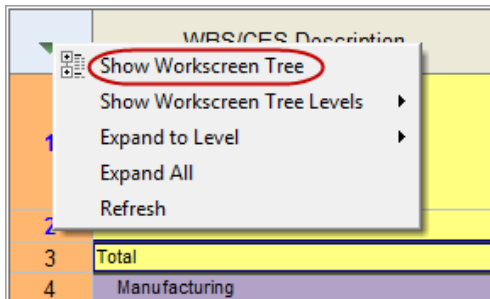

ACEIT 7.4 Highlight

We hope you have installed ACEIT 7.4 and are exploring all the new features. What are the new features? Where the heck is the help button? Have you found the Add Case button? How about the ACE charts? How do I enable the WBS tree on the workscreen?

Help can be accessed by clicking the help icon (🔗) on the upper right corner of the window or from the File menu. Help opens on the "What's New" topic which lists all the new features of ACE 7.4. To find specific commands like Add Case and View Charts, click on the *ACE ribbon link* to see the topic entitled "Mapping 7.3 Menu to 7.4 Ribbon". This topic lists the *old 7.3* menu structure along with the *new 7.4* ribbon locations.

ACE 7.4 can now show the WBS tree on the workscreen. This option is not automatically enabled when sessions are converted from 7.3 to 7.4. You can activate it by right clicking on the down arrow in the upper left corner and selecting **Show Workscreen Tree**.
