Tip of the Month

Did you know that you can hide the ribbon in ACE?

This can be useful if you want to see more rows in your estimate. Hide the ribbon by right clicking anywhere on the ribbon and checking "Minimize the Ribbon." The names are still visible at the top of the screen and clicking on the name displays that ribbon. To restore, right click on one of the ribbon names and uncheck "Minimize the Ribbon."

You can also customize the **Quick Access Toolbar**, located in the upper left corner of ACE. To quickly add a new item to the toolbar, right click on a command and select "Add to Quick Access Toolbar." To re-arrange the toolbar or add multiple commands at once, select "Customize Quick Access Toolbar."

SUPPORT ALERT

POST 7.4/7.4a - WARNING: Update report button doesn't work properly on reports with allocated RI\$K

Date: 10/7/2014
Application: POST
Version: 7.4 and 7.4a

Problem: POST does not properly update reports that contain allocated RI\$K results. Point Estimate results are reported instead of allocated RI\$K results. This occurs when relinking these reports to a different session as well.

Workaround: This problem occurs when session properties do NOT have the "Always calculate with RI\$K" option selected. You can set this option in ACE on the Calculation tab of the Session Properties dialog or in POST by clicking on the Case Properties button from the Manage Cases dialog.

Alternately, you can force an update by selecting Edit (in the Reports group of the ribbon), then clicking OK.
