Thank You for attending the 2010 ACEIT User Workshop

Thanks to everyone who attended, presented, or contributed to the 2010 ACEIT User Workshop. There were many great presentations this year and we hope that everyone benefited from the wide scope of papers. All presentations and supporting documentation/sessions are available on the ACEIT website for [download](#).

Save the date! The 5th Annual ACEIT User Workshop has been scheduled for January 24-26, 2011 in Santa Barbara, CA.

Hot Fix Available for ACEIT 7.2

[ACE Hotfix 7.2-001](#) is available for download. This hotfix repairs five problems that were reported after the production version was released. If you are experiencing **problems e-mailing ACE 7.2 session files**, please download this hotfix.

This hotfix also corrects the following errors:

- Definitions are being stripped out of ACE sessions** when they are sent through some email systems
- IRV response time is extremely slow when entering overrides** for a large session (e.g., 7500 rows, 40 years)
- Find and Replace causes ACE to crash when the direction is set to "up"
- Multi-select rows to create custom risk CDFs only creates CDF for first row

We anticipate releasing ACEIT 7.2a Patch in the April timeframe. Please send any 7.2 errors you find to [ACEIT Support](#).

2010 Inflation Indices Now Available

There is a new download file available to install the ACEIT System Inflation Database, adding the 2010 Inflation Indices. All services' indices have been updated with the latest inflation guidance. Please download this file from the [Inflation Indices](#) page located in the Download section of ACEIT.com. You will be required to login to the website, as your DMS must be current to install inflation updates.

Inflation indices updates for ACEIT 6.x and 7.x are available.

Occasionally, the install generates an error on Windows Vista. If you have problems installing the indices, click on the [support alert](#) to manually update the indices.
