ACEIT — Automated Cost Estimating Integrated Tools

Automating the Estimating Environment

Relevant and Accurate Data is the Lifeblood for Cost Analysis

ACEIT:ACDB — Automated Cost Database
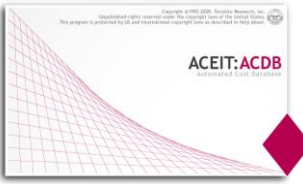

ACDB is a comprehensive and flexible database solution to allow easy access to relevant cost, technical and programmatic information.

- ♠ Allows access to relevant data
- ♦ Develop methodologies, learning curves and cost factors
- ♣ Integrates with statistical software packages
- ♥ Enhances the quality of estimating methodologies

ANALYZE
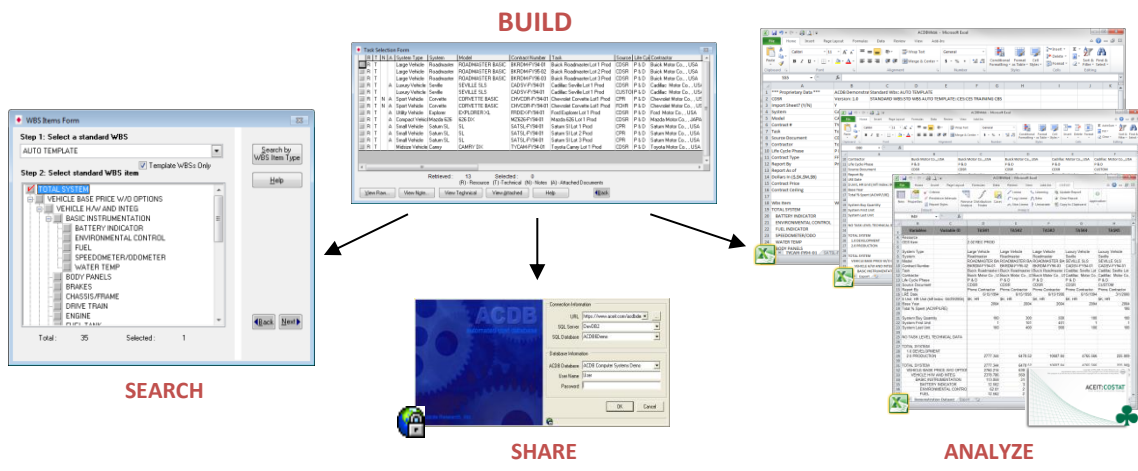

Database Development Kit (DDK)	Report Wizard
✓ Used by a database developer or administrator (DBA) to structure and populate database	✓ Used by estimators and analysts to access/extract data to use for analogy, factor, CER, or learning curve methodologies
✓ Easily map and normalize data to a standard WBS and constant Base year	✓ Easily conduct advanced sorts and filters
✓ Allows cost analyst to build a cost/schedule/technical/programmatic database to support cost research	✓ Review historical studies, cost reports, program information, and technical data
✓ Includes built-in support for most of the standard DoD cost reporting formats, e.g., CPR, CDSR, FCHR, C/SSR and CFSR.	✓ Search and retrieve: - Raw costs - Mapped and normalized data by WBS - Mapped and normalized data by CES - Technical data
✓ Includes templates for custom data formats and contract pricing documents	
✓ Automatic data loading through Excel	**.Net Report Wizard**
✓ Stores a wide range of information including attached documents, notes, technical data, raw/normalized cost data	Same features as Report Wizard with additional capabilities: ✓ Centralized data access over LAN/WAN or Internet ✓ Built-in multi-level security

Note: See www.aceit.com for a list of available ACDB Government databases

Other ACEIT Applications

Automated Cost Estimator (ACE) is the estimating portion and heart of the ACEIT application suite; it is a model-building tool.

Cost and Statistical Analysis Tool (CO$TAT) is a statistics package that has been designed for the cost/price analyst containing key features found in most major statistical applications.
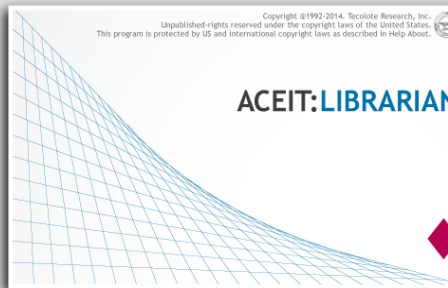

Program Office Support Tool (POST) allows for quick reporting, charting and what-if drills in Excel.

ACEIT Librarian is a powerful tool enabling any organization to automatically build and maintain methodology libraries and custom inflation tables. These libraries can then be accessed by other ACEIT applications.
